

# FinOps Review

How to bring financial governance to your organisation

FinOps is an evolving cloud financial management discipline and cultural practice that enables organisations to get maximum business value by helping engineering, finance & business teams to collaborate on data-driven spending decisions.

## ASSESSMENT

Assess where the organisation is in all areas of FinOps and determine the proposed savings of moving forward with a FinOps model and the Araza framework.

## BLUEPRINT

Araza follows a blueprint that has been modified for the client to enhance visibility, allow for better data levers, maintain team focus, drive productivity and reduce waste.

## FINOPS STRUCTURE

Establishing a FinOps aligned structure allows teams to work together and collaborate more efficiently and effectively with a clear FinOps focus.
